

The Power of We™

3641/3645/6120/6140 IP Wireless Phones

Overview

Avaya IP Wireless Phones are designed for organizations that want the convenience of wireless communications and the benefits of IP-based converged communications solutions. These wireless phones connect to your LAN, simplifying the management of your communications infrastructure. Wireless voice solutions enable users to be available to customers and co-workers virtually anywhere, helping to improve productivity.

Avaya 3641/6120 IP Wireless Phone

Avaya 3645/6140 IP Wireless Phone

Capabilities

The Avaya 3641/3645/6120/6140 IP Wireless phones are designed to meet the needs of workers in both office and industrial environments. While away from their desks, associates can make and receive calls (yet still see their Caller ID), place calls on hold, set up conference calls, call back unanswered calls and check for messages, along with many other capabilities. Navigation keys provide the user with easy, efficient access to additional functionality such as directory access and redial lists.

With their backlit keypad and large display, the Avaya 3641 and 6120 IP Wireless phones address the day-to-day rigors of the mobile user across many industries. Lightweight yet rugged, these phones are resistant to dust, shock, and liquid damage. The built-in speakerphone as well as headset compatibility help enhance productivity and responsiveness for the user. The extended battery-life options increase accessibility through 24 hour operation.

The 3645 and 6140 IP Wireless phones are ideal for industrial environments - features such as the push-to-talk capability eliminate the need for two-

way radios. The larger earpiece provides comfort for the user and reduces background noise. The 3645 and 6140 IP Wireless phones include a back-lit keypad and large display for ease of use. Built-in speakerphone, headset compatibility, and extended battery-life options boost efficiency and extend accessibility.

The 3641/3645/6120/6140 IP Wireless phones support the following:

- 128 x 96 backlit display with icons and line-status indicators
- Standard battery - 4 hours talk time, 80 hours standby time
 - Optional extended battery - 6 hours talk time, 120 hours standby time
 - Optional ultra-extended battery - 8 hours talk time, 160 hours standby time
- 802.11a, 802.11b, and 802.11g standard-compatible
- Dust, shock and liquid damage resistant
- Headset jack (2.5mm)
- Speakerphone
- Audible and vibration alerts
